PRESCRIPTION ANIMAL REMEDY
KEEP OUT OF REACH OF CHILDREN
FOR ANIMAL TREATMENT ONLY

TRIAMOLONE-FORTE INJECTION

6 mg/mL Triamcinolone acetonide.

COMPOSITION

Each mL contains 6 mg triamcinolone acetonide.
Benzyl alcohol 9 mg/mL is present as a preservative.

INDICATIONS

Suppression of inflammation in dermatological disorders and arthritic conditions in dogs, cats and horses.

DIRECTIONS FOR USE SHAKE WELL BEFORE USE

Intramuscular or Subcutaneous Injection

Dogs and Cats: 0.1 to 0.2 mg/kg bodyweight

Horses: 12-20 mg

Intra-articular, Intrasynovial Injection

Dogs and Cats: 1 to 3 mg

Horses: 6 to 18 mg

PRECAUTIONS

Corticosteroids tend to decrease chemotactic properties of phagocytes and thus tend to decrease the efficacy of host defence mechanisms. Use such drugs with caution where severe tissue damage is present. Where an infective process is suspected, initiate concurrent antibacterial therapy. The administration of corticosteroids has, during the last trimester of pregnancy, been demonstrated to precipitate premature parturition.

MEAT WITHHOLDING PERIOD (HORSES): DO NOT USE in horses intended for human consumption.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre.
Phone Australia 13 11 26.

STORE BELOW 25°C (Air Conditioning) - PROTECT FROM LIGHT.

DISPOSE of container by wrapping with paper and putting in garbage.
