

PRESCRIPTION ANIMAL REMEDY
KEEP OUT OF REACH OF CHILDREN
FOR ANIMAL TREATMENT ONLY

BRONCOPULMIN PLUS TMPS

ORAL POWDER

Active Constituents:

21.44 ug/g CLENBUTEROL HYDROCHLORIDE
335 mg/g SULFADIAZINE
67 mg/g TRIMETHOPRIM

**Oral bronchodilator and antibacterial for
respiratory disease in horses**

500 g

Actual
Size

INDICATIONS: For the treatment of respiratory disease in horses caused by organisms susceptible to the trimethoprim/sulfadiazine combination. Treatment of respiratory conditions characterised by constriction of the airways. This includes bronchospasm and obstruction resulting from bacterial and viral infection, bronchitis and bronchopneumonia. Indicated whenever bronchodilation and antibacterial protection is desirable.

DIRECTIONS FOR USE:

Restraint: DO NOT USE in food-producing animals.

Contraindications: BRONCOPULMIN Plus TMPS Oral Powder will potentiate the action of corticosteroids and antagonise the effects of Prostaglandin F_{2α} and Oxytocin. Beta adrenergic agents adversely affect the action of BRONCOPULMIN Plus TMPS Oral Powder. Therefore concurrent treatment of horses with these agents is not recommended. BRONCOPULMIN Plus TMPS Oral Powder should not be used in horses during the last 14 days of gestation as uterine contractions may be prevented.

ADMINISTRATION: Give 1 level scoop (9 g) orally per 250 kg bodyweight, twice daily.

MEAT WITHHOLDING PERIOD: DO NOT USE in horses that may be slaughtered for human consumption.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre.

Phone Australia 131 126.
